

Agentur Sonnenklar

11/2020 –

Initiator

Department disability, mobility and counseling of the Fonds Soziales Wien

Objectives

The Fonds Soziales Wien has commissioned an evaluation of the *Agentur Sonnenklar / Drehscheibe Peerstreitschlichtung* to obtain an insight into the project.

The Agentur Sonnenklar deals with institutional violence in daycare centers for people with disabilities in Vienna. Inclusive workshops for customers, staff and facility managers are carried out by the Agentur Sonnenklar. At the same time, the Agentur is a knowledge base for institutional violence and peer mediation (Drehscheibe Peerstreitschlichtung). In the course of the project, ten persons (customers of daycare facilities) have been trained as peer-mediators and now offer peer mediation services in daycare facilities.

The objectives of the evaluation are manifold: The organization of the workshops, the cooperation of the relevant stakeholders and the peer mediation service are researched into. A special focus is on the usability and relevance of the workshops for their participants. The effects, sustainability and the possible improvements of the project are evaluated as well as the impact of COVID-19.

Implementation

In each of the three research phases 12 qualitative interviews with workshop participants are carried out (project team, staff, customers and managers of daycare facilities). After two research phases, feedback workshops are carried out. In these feedback workshops, representatives of the Fonds Soziales Wien, the Agentur Sonnenklar and the peer mediators discuss the preliminary results of the evaluation. The third and last research phase is realized with the managers of the daycare facility providers, the centre of attention being institutional change.
